

ENVIRONMENTAL AWARD 2006

sponsored by

If you are a tourism business such as a B&B, hotel, tour operator, self-catered accommodation provider or attraction then EVIVO can help take your business online and start to take bookings.

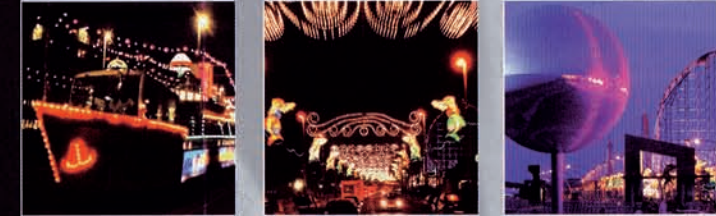

EVIVO's products are different from other internet booking solutions:

- It is a piece of software designed specifically for small to mid-sized tourism businesses.
- It helps you manage your entire business, not just your internet bookings.
- You receive payment up front directly into your bank account.
- There is no need to allocate your rooms or tickets to another system.
- Any inventory you have not sold is automatically distributed for sale on the internet saving you time.
- It includes a personalised booking webpage that can be added to your existing website.
- You keep control of your prices and commissions.

You maybe surprised how easy and affordable it is to start trading online.
